GROOVED DECORATIVE BOARDS

Add a prominent visual and textural element to your furniture and interiors with our Grooved Decorative Boards, which recently gained popularity with our customers and are now available as a standard product made by Cworkshop.

CHOOSE YOUR STYLE

New product launch!

We are releasing an exciting new range of products: Grooved Decorative Boards. Made using Finsa's Hidrofugo moisture resistant MDF, Twincolour MDF or oak veneered black MDF, they come in five different designs, which we expertly machine in our factory. The excellent routing capabilities of these products allowed us to create a surface with a smooth, clean-cut finish ready for a coat of paint or lacquer.

Hidrofugo MR MDF has one of the best moisture resistant qualities, meaning you can use these in bathrooms, kitchens and any other room exposed to humidity. We can paint them in any colour with our professional spray painting service to add a touch of personality.

If you want a unique design to create an exciting interior, consider Twincolour MDF, available in five different colour combinations. You'll be sure to turn heads with their dual-colour interplay and charisma.

Bring nature inside using natural oak veneer with a contrasting black-cored MDF that produces a mesmerising effect, making an interior the pinnacle of grandeur.

The boards are available in two sizes with thicknesses ranging from 12mm to 22mm*. You can use them to make furniture, wall features and even room dividers.

*Due to routing, grooved boards are prone to a slight lateral bow along the board's length. We have conducted tests for all designs on all board sizes and thicknesses and have found that the bowing of the board, when measured in the middle, ranged:

- 12mm board – from 10-20mm;
- 16mm, 18mm, and 19mm board – from 3-10mm;
- 22mm board – from 1-3mm.

Slatted
Oak Veneered Black MDF

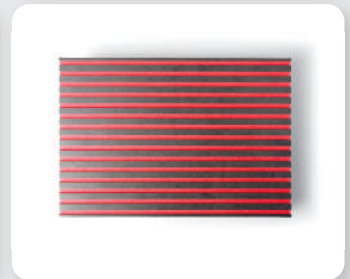

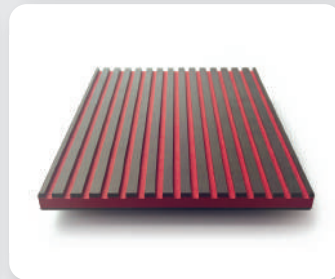

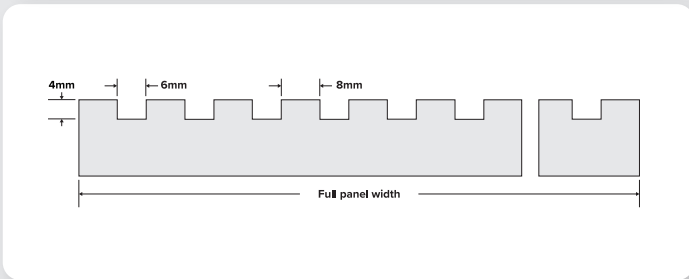

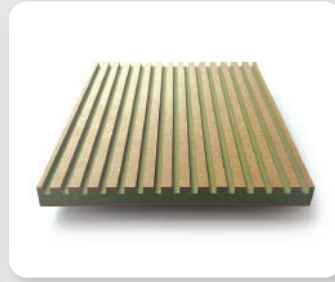

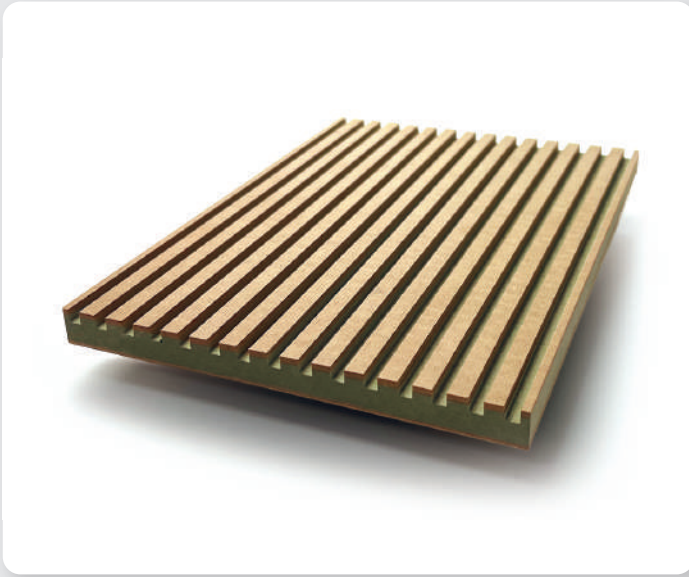

Fluted
Twincolour MDF

V-grooved
Twincolour MDF

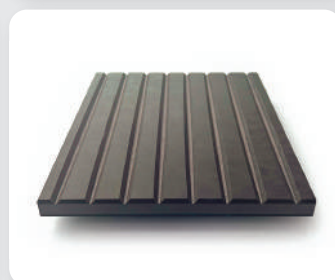

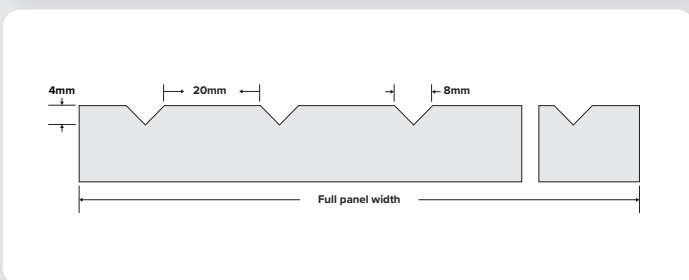

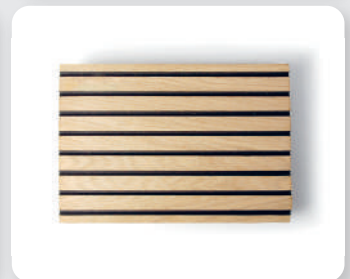

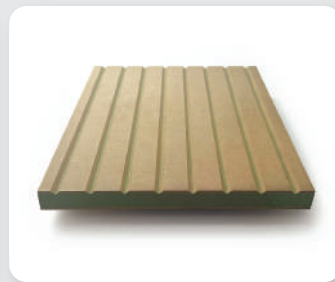

SLATTED

Parallel bars, rectangular troughs

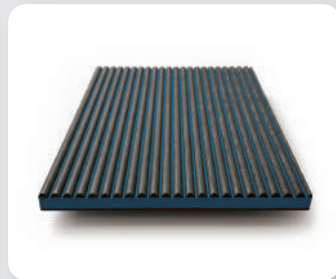

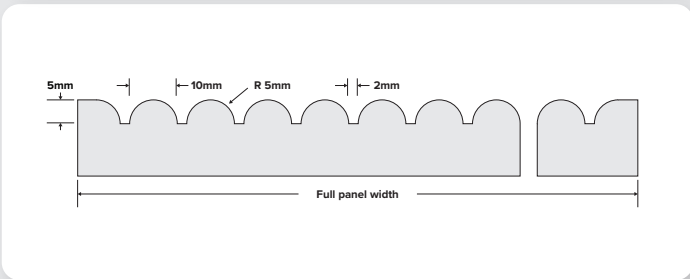

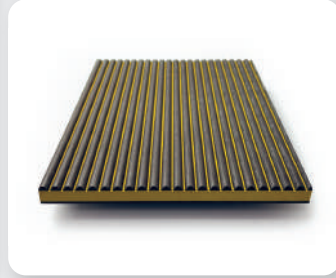

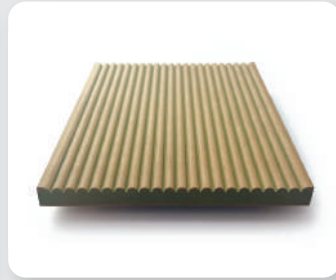

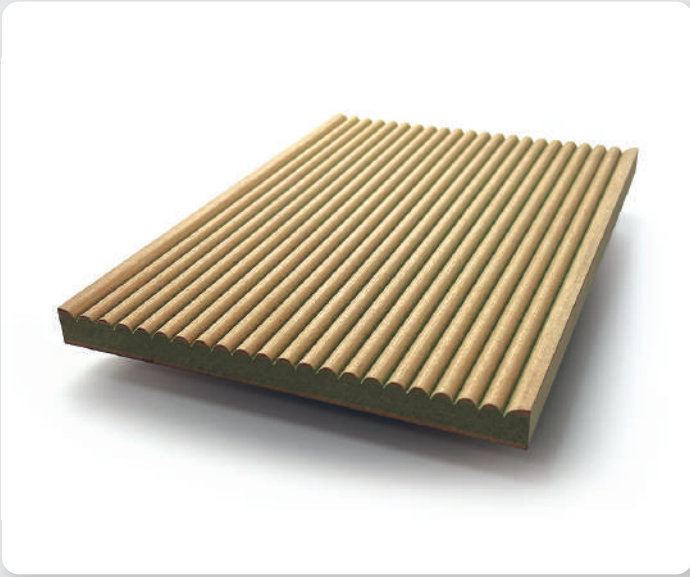

V-GROOVED

Deep V grooves

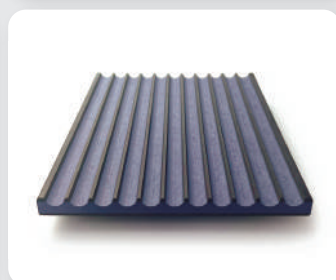

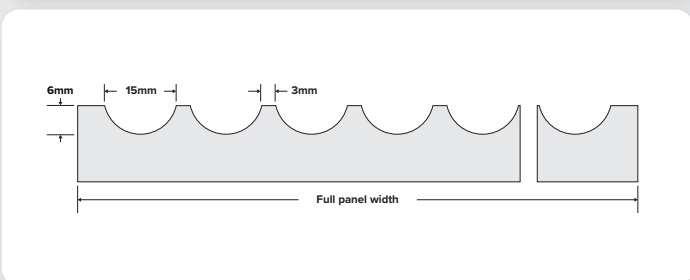

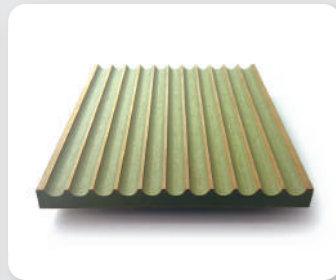

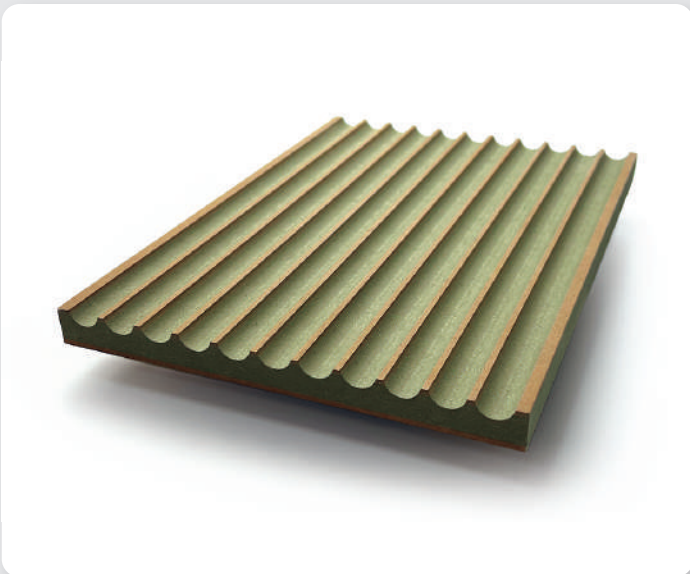

RIBBED

Semi-circular domes, shallow grooves

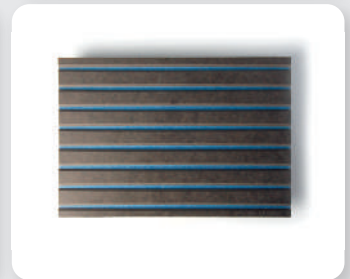

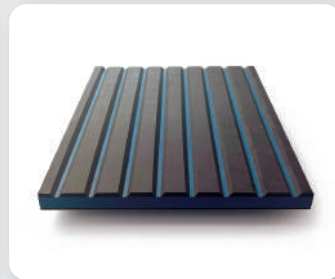

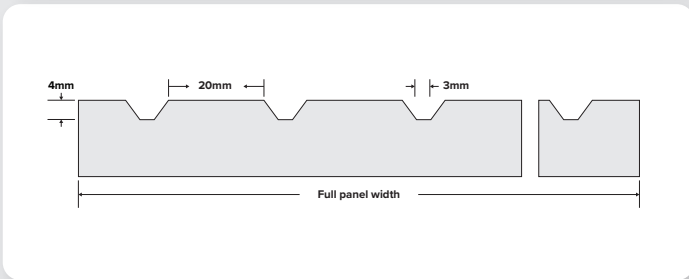

FLUTED

Oval grooves, plateaued peaks

CHAMFERED

Angled cuts on wider parallel bars
